

Ford Remanufactured 6.4L and 6.0L Cylinder Heads

Only Genuine Ford Remanufactured 6.4L and 6.0L Cylinder Heads feature proprietary OE engineering enhancements

Product engineering and remanufacturing processes are continuously improved to help minimize downtime and repair expense while maximizing durability and performance.

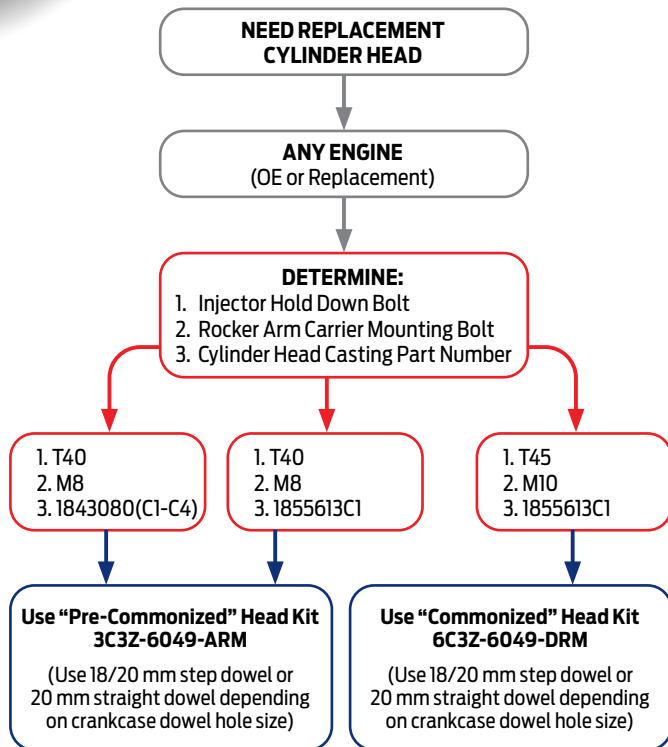

Remanufactured to OEM Specifications:

- Cylinder head to block mating surface machined to help ensure optimum flatness and surface finish
- Precision machined guides and seats help ensure consistent valve sealing
- Multi-stage precision leak decay testing helps ensure consistent valve sealing
- Quality remanufacturing processes listed below help ensure durability:
 - 100% of remanufactured heads are wet magnaflux checked for cracks
 - 100% new OEM valves are installed
 - Precision CNC replacement of all worn valve guides outside of specification (no oversizing)

Remanufactured 6.4L Cylinder Head

Cylinder Head Kit Selection Chart

Ford Part #	Model Year	Application
6.4l Cylinder Head Kit		
8C3Z-6049-BRM	2008-2010	F-250/F-550
